

ADAS event record

Use this after an unexpected warning, braking, steering input or loss of assistance. Complete it only when safely parked.

Immediate safety: This form does not determine whether a vehicle is safe to drive. If control remains affected, a collision or injury occurred, or the vehicle instructions require immediate action, use appropriate emergency or roadside assistance.

1 Vehicle

Make and model

Model year

Country or market specification

Registration or VIN - optional

2 Event

Date and approximate time

Approximate location or road type

Approximate speed

Selected feature or driving mode, if known

What did the vehicle do? Include braking, steering, vibration, reduced power or loss of assistance.

Exact warning words, symbols, colours and sounds

3 Conditions

Traffic and nearby objects

Road shape and lane markings

Weather, light and visibility

Did it disappear, persist or repeat?

4 Recent changes

Repairs, collision damage, glass, bumper, alignment, suspension, tyres, battery work or software updates

5 Follow-up

Owner-manual instruction found

Repairer or manufacturer contacted

Case, repair-order or report number

Photos or original dashcam file retained

Diagnosis, advice or outcome - record who provided it and when

Keep only the personal information you need. Do not publish a VIN, registration, precise location, contact details or identifiable footage without considering privacy and safety.

General education only - not vehicle-specific diagnosis, legal advice or an emergency service. adasproject.com
