ADAS PROJECT

Three questions to ask at a car handover

Take this card to your next handover or driving lesson.
Ask for a demonstration with the car safely parked.

01 What does lane assistance do in this car?

Does it warn me, nudge the steering, or help keep the car centred?

02 What happens when I set a cruise speed?

Where do I see the set speed, following gap and system status?

03 Where can I look up a warning I see later?

Show me the relevant section in the manual for this exact model.

Want the explanations in one place?

Don’t Fight Your Car by Hiran Alwis
